

BODEGA BAY FIRE PROTECTION DISTRICT

STANDARD OPERATING GUIDELINES	Article:	SOG 2-22
	References:	
	Subject: <i>Traffic Markings</i>	

Public traffic is to be considered a part of the fire scene operations.

The incident commander should assign traffic control duties as the situation demands.

Other officers and firefighters should observe and report developing traffic problems.

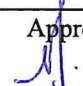

When the CHP officer arrives, the Incident Commander will report to him/her and let him/her know the situation.

A request for a tow truck will usually go through the CHP officer in order to eliminate duplication. CHP needs to know: Are they members of any towing service, or do they have a preference?

If a vehicle must be moved, it may be done when there is an extended response time for the CHP, there are no injuries, and if the vehicle is blocking the highway and is a hazard. Mark the tire location with spray paint. Mark the tires as noted below.
